

**PRESS RELEASE
FOR IMMEDIATE RELEASE**

Telecorp Acquisition Updates

Cheyenne, Wyoming February 16, 2010– Telecorp, Inc., a leading developer of state of the art CRM and Client Contact software solutions; announced today a number of updates in regards to two acquisitions.

dBI Database Intelligence of Vestal New York, developers of the well known **dBase** and **dQuery** products.

Medical Software (name withheld upon finalization of Letter of Intent) is a doctor, clinic and hospital patient software management system which Telecorp's tools would work well within. The Medical Software is based out of New Jersey, USA. (Please contact Paul Phillips at pPhillips@telecorp.com for more information.)

All acquisitions should be completed by March 15th 2010.

Both Acquisitions are in the final stages and a positive outcome is anticipated.

"dBI has invested about \$10M or more since we acquired the ownership of the dBASE software from Borland in 1999, by improving the dBASE software many times as well as developing new products. We do think that our new and improved 2.62 product release coming out this month (February) will be very successful when coupled with a proper marketing program, discount pricing, internet sales, and medical and other applications and especially when integrated with the Telecorp plan. In addition, we have other dBASE software upgrades and extensions planned beyond the upcoming 2.62 product release."
stated Don Franck, Director and acting CEO of DataBased Intelligence Inc.

Telecorp's agreement and final Letter of Intent is anticipated within two weeks with dBI. All aspects have been discussed and both dBI and Telecorp are close to agreement. Final agreement with dBI is expected within two weeks and agreement with the Medical Software Company is expected within 10 days.

Telecorp Inc. is also very close to gaining access and being accepted on a global exchange. It is anticipated that Telecorp will be trading publically within 10 to 15 days.
