

PRESS RELEASE FOR IMMEDIATE RELEASE

Telecorp Introduces; VoIP System

Cheyenne, Wyoming November 25, 2008– Telecorp, Inc., a leading developer of state of the art CRM and Client Contact software solutions; announced today, that they have a agreement in place to develop their own Voice Over Internet Protocol (VoIP) system with a number of suppliers. The system will offer the Company many more opportunities to sell its growing list of products and at the same time help their clients reduce their costs.

The system will be installed on a series of servers around the world and will allow seamless connectivity for Telecorp's clients to connect to their customers. The enhancements and launch is anticipated to be late spring 2009 and be on target for a number of new products Telecorp is scheduled to be released.

Each module we have will allow up to 30 inbound or outbound calls simultaneously. This will allow the Company to process over 50,000 voice messages or voice calls per module per day per 15 hour period. This system will also allow SMS messaging and fax broadcasting capabilities to be increased as well.

"We on the verge of becoming a true one stop operation to help offices automate their customer relations, marketing and sales endeavors." said Paul Phillips, President of Telecorp, Inc. "We anticipate that once this new solutions is fully online we will be able expedite other products that we have waiting in the wings for development, these are very exciting times for our company".
