

**PRESS RELEASE
FOR IMMEDIATE RELEASE**

Telecorp announces Letter of Intent

Cheyenne, Wyoming January 15, 2010– Telecorp, Inc., a leading developer of state of the art CRM and Client Contact software solutions; announced today that it has issued a Letter of Intent to acquire **Database Intelligence (dBI)** of Vestal New York.

dataBased Intelligence, Inc. (dBI) is the legal heir to the **dBASE™** legend. Created over a quarter century ago, by the founders of **Ashton-Tate**, and popularized by **Borland**, dBASE is the world's most accepted database standard.

Today, dBASE is used by millions of people in *Fortune 1000* companies and governmental agencies around the globe. And it's trusted by thousands of the earth's most demanding software developers. Recently, dBI introduced a new product that will transform Business Intelligence the way dBASE transformed data management. Called **dQuery™**, it's the first software that connects information in the 12 most popular databases with each other. In real time and from any desktop anywhere you are. These databases include; *Informix, Pervasive, Oracle, SQL Server, Visual FoxPro, DB2, InterBase, FoxPro, ODBC, Paradox, Sybase* and of course dBase.

"We are totally excited about this opportunity before us" said Paul Phillips CEO of Telecorp Inc. "The synergies that dBI and Telecorp have in common are overwhelming and we feel with a little time we can market dBI products line beyond their present state and more importantly our plan is to bring together several applications that will infuse an excitement in many industries, particularly the medical industry."

Besides dBase and dQuery, dBI offers other unique products such as **dBI On-Line PriceBook™** which is a solution for grocery stores and distributors. This solution puts an end to searching through hundreds or even thousands of printed pages and those piecemeal attempts at price books. Instead, you will get fast and easy look-up of current prices from everywhere.

dBImobile™ allows clients to get their business information on a mobile device. With high security and with multiple purposes like hospitals, emergency response, police, government and business it is now easier to get your information anytime and anywhere.

Telecorp is hoping to conclude an agreement in February 2010. Details as they develop will follow.
